4. Ichigo Hotel's Environmental Initiatives

In line with its sponsor Ichigo joining RE100, Ichigo Hotel completed the transition of all its assets to renewable electricity in December 2023. This was achieved through electricity contract conversions and the purchase of non-fossil fuel certificate tracking. Ichigo Hotel also transitioned the two hotels acquired this year in January and February by purchasing non-fossil fuel certificate tracking. Similarly, Ichigo Hotel is planning to purchase non-fossil fuel certificate tracking for the hotel acquired on July 28, 2025.

Ichigo Hotel will continue to promote environmental and energy efficiency and reduce the environmental impact of its hotels.

Note: Non-fossil fuel tracking certifies the environmental value of renewable electricity generated by Ichigo's power plants.
