Reference Information

1. Details of the Over-Allotment Secondary Offering (“Greenshoe”)

Taking into account demand and other factors, SMBC Nikko Securities Inc. (Lead Manager) may implement a secondary offering of shares (up to a maximum of 5,800 shares) borrowed from Ichigo Inc.’s shareholders. Depending on demand as well as other factors, the number may decrease or the secondary offering through over-allotment itself may not be held at all.

In order for SMBC Nikko Securities Inc. to acquire the shares needed to return the borrowed shares, Ichigo Hotel REIT’s Board of Directors has resolved to issue 5,800 new shares to the underwriter, with SMBC Nikko Securities Inc. as the allottee. The payment date is designated as September 13, 2016.

In order to return the borrowed shares used in the over-allotment secondary offering (“Greenshoe”), SMBC Nikko Securities Inc. may also purchase shares up to the number in the secondary offering (over-allotment) in the market at the TSE (the “syndicate cover transaction”) from the day following the close of the subscription period until September 8, 2016 (the “syndicate cover transaction period”). All of the shares purchased by SMBC Nikko Securities Inc. through the syndicate cover transaction will be used to return the borrowed shares. At its own discretion, SMBC Nikko Securities Inc. may choose not to conduct the syndicate cover transaction or choose to end the syndicate cover transaction with a total of shares that is smaller than the number offered through the secondary offering (over-allotment).

Moreover, SMBC Nikko Securities Inc. may conduct stabilizing transactions in relation to the public offering and the secondary offering (over-allotment). The shares purchased through such stabilizing transactions may be used, in whole or in part, to return the borrowed shares.

SMBC Nikko Securities Inc. intends to agree to the underwriter new share allotment for the following number of shares: the shares in the over-allotment secondary offering (“Greenshoe”) minus the shares purchased by SMBC Nikko Securities Inc. through the stabilizing transactions and the syndicated cover transaction. As a result, there may be cases in which there will be no subscription either in whole or in part to the shares offered by the underwriter new share allotment and, accordingly, the final number of shares issued by way of the underwriter new share allotment will decrease due to forfeiture of rights or such issuance itself will not take place at all.

Whether or not the secondary offering through over-allotment will be conducted as well as the number of shares to be offered will be decided on the Pricing Date. In case there is no secondary offering through over-allotment, SMBC Nikko Securities Inc. will not borrow the shares from the shareholders. Subsequently, there will be no subscription by the underwriter to the shares offered in the underwriter new share allotment and, accordingly, the shares shall not be issued in the underwriter new share allotment due to forfeiture of rights. Further, there will be no syndicate cover transaction at the TSE.

SMBC Nikko Securities Inc. will conduct these aforementioned transactions in accordance with consultations with Mizuho Securities Co., Ltd.

2. Change in Number of Shares Outstanding After New Issuance

Total number of shares outstanding at present:	138,500 shares
Increase in shares from public offering:	115,800 shares
Total number of shares outstanding after public offering:	254,300 shares
Increase in shares from the underwriter new share allotment:	5,800 shares ¹
Total number of shares after the underwriter new share allotment:	260,100 shares ¹

¹ Assumes that SMBC Nikko Securities Inc. subscribes to all the shares issued in the underwriter new share allotment and that all such shares are issued.

3. Purpose of New Issuance

By taking full advantage of its sponsor Ichigo's deep value-add capabilities and executing upon Ichigo Hotel REIT's growth-driving action plans, Ichigo Hotel REIT is committed to maximizing shareholder value for Ichigo hotel REIT shareholders.¹

As announced in today's release "Acquisition of Ten Hotel Assets," with today's ten hotel acquisitions Ichigo Hotel REIT is more than doubling its portfolio size from JPY 20.4 billion to JPY 47.6 billion.² The acquisitions will be financed by the public-offering net proceeds, bank borrowing, and cash-on-hand. The growth in Ichigo Hotel REIT's market capitalization and shares outstanding via this public offering is expected to significantly improve Ichigo Hotel REIT's share liquidity.

Of the ten hotels, five have variable rent leases with the hotel operators (in which Ichigo Hotel REIT shareholders share in the upside/downside of higher/lower hotel rates) and five are fixed rent leases. The forecast average NOI yield of the acquired assets is 5.5% and the average post-depreciation NOI yield is 4.3%.^{3,4}

Ichigo Hotel REIT believes that today's acquisitions will contribute both to Ichigo Hotel REIT's earnings stability via geographic and asset diversification and its ongoing earnings growth. The acquisitions of these ten stay-only hotels⁵ will also support the generation of core earnings stability for Ichigo Hotel REIT shareholders via fixed rent leases, while providing earnings upside via variable rent leases at hotels benefiting from overseas tourist demand and rising hotel rates in Tokyo, Osaka, Hokkaido, and Okinawa.

Ichigo Hotel REIT will continue to work to maximize shareholder value via the execution of its external and organic growth strategies and by leveraging Ichigo Group's strengths.⁶

¹ Ichigo Hotel REIT's action plans merely represent future plans, and their actual implementation is not necessarily guaranteed. Moreover, the action plans are subject to change.

² The total acquisition price of the assets is the sum of the amounts set forth in the contract for each trust beneficiary interest in real estate. It does not include consumption tax or other expenses related to the acquisition (brokerage fees, taxes and public charges).

³ The average appraisal NOI (net operating income) is calculated as total appraisal NOI (as stated in the real estate appraisal reports) divided by the total acquisition price of the assets.

Although the average appraisal NOI yield is calculated by Ichigo Real Estate Investment Advisors in accordance with the real estate appraisal reports, this calculation is not directly taken from the real estate appraisal reports and may differ from any such calculation in the reports and the actual post-acquisition NOI yield.

We caution investors to refer to the Investment Corporation's prospectus and notice of amendments thereto, if any, without fail and to undertake investment at their own decision and responsibility.

⁴ Average post-depreciation NOI (net operating income) yield is calculated by dividing the sum of the appraisal NOI and depreciation by the total acquisition price of the assets. Depreciation is an estimated value calculated by Ichigo Real Estate Investment Advisors using the straight-line method. Although the average post-depreciation NOI yield is calculated by Ichigo Real Estate Investment Advisors in accordance with the real estate appraisal reports, this calculation is not directly taken from the real estate appraisal reports and may differ from any such calculation in the reports and the actual post-acquisition NOI yield.

⁵ Stay-only hotels are located near train stations, airports, business centers, major thoroughfares, shopping centers, and other areas of high customer traffic. These hotels service travelers primarily as places to stay at very attractive rates, without extraneous banquet facilities, etc.

⁶ Ichigo Group is comprised of Ichigo Inc. and its consolidated subsidiaries (including the asset management company that manages Ichigo Hotel REIT, Ichigo Real Estate Investment Advisors).
